Terms and conditions:

In order to tune the vehicle/ECU, it is understood that the factory operating parameters will be modified. Alphaspeed Midwest (ASMW) is not responsible for any eventuality or event arising as a result of modifying the operating parameters which have been established by the manufacturer. If there is a claim for the removal of a product alongside undoing the modifications to the customer's vehicle, the Customer will be waiving the right to make any additional claim. All product removal work will not be guaranteed once the vehicle leaves the premises of Alphaspeed Midwest or the location at which the product is being delivered. Every tuning service provided by Alphaspeed Midwest or representatives will be covered in its entirety by the owner of the vehicle without distinction of the final result of the product. Said labor cost is not refundable and must be paid in full before the vehicle is able to leave the premises.

Professional installation of all products sold by Alphaspeed Midwest is recommended, and is not a service provided by ASMW. Neither ASMW nor any Alphaspeed dealer can warranty or guarantee working order of an ECU due to misuse or mishandling once it has left our possession. Nor can any Alphaspeed dealer can be held responsible for any fees, labor costs, or parts/repair costs incurred by the handling, mishandling, installation, or misuse of an ECU or any peripheral(s) related to installation. Our tuning services are strictly for off road use, and any use on public roads is not recommended or guaranteed, as stated in our verbal (and written if applicable) agreement before the tuning process is started.

Tuning your ECU requires specialty equipment and processes that may result in a bricked ECU. We do take every precaution necessary to try and prevent this, but the risks are still there. In the event of a bricked ECU, you may need to purchase a replacement ECU or send your ECU off to get repaired which will incur additional time and cost. Changing your factory tuning parameters can be dangerous and can result in damage to the engine and/or other parts of your drive train. We work with experienced tuners to avoid these types of problems, but there is still the risk of engine damage caused by improper installation of parts, incorrect information provided to the tuner about your mods and changing your mods after the tuning process. If you plan to make changes after your tune, let us know BEFORE you get tuned. Additionally, modifying factory ECU parameters in any way can void your warranty. No guarantee is made by ASMW in the event that warranty work may need to be performed by a Hyundai dealer or 3rd party.

I agree to all terms and conditions:
